4 Point
Suspension System

ROCKER ROPE GRAB

- Versatile and lightweight (0.17kg) manual and automatic rope grab.
- Complies with EN353-2 and EN358
- Ref. : 1007031

ROPE PROTECTOR

- The PVC reinforced rope protector is designed to protect the rope against abrasion and cutting edges on buildings or rocks.
- Ref. : 1010214

ROPE ASCENDER

- Designed for easy connection to the rope, the Rope Ascender offers a comfortable and efficient grip for improved climbing control.
- Lightweight alloy.
- Ref. : 1007041 (Right-hand ascender)

WEBBING ETRIER

- Used in conjunction with the rope ascender and Cam-Clean, the Webbing Etrier facilitates the ascension of a fixed rope.
- Ref. : 1010168

STATIC ROPE

- Braided polyamide rope, Ø10.5mm
- Length: 200m
- Also available in other lengths.
- Ref. : 1004512

PROALLP TECH DESCENDER

- Descent device including belay brake, tensioned line brake, ascender and hauling system brake function.
- Complies with pr EN12841-C
- Ref. : 1007057

INDUSTRIAL CLIMBERS SEAT

- The detachable industrial climbers seat offers a comfortable supported position for the operator during prolonged periods suspended at height.
- Supplied with two connectors.
- Adjustable straps for perfect fit.
- Ref. : 1007056

CAM-CLEAN ASCENDER

- The chest ascender is designed to hold the operator in a comfortable upright position.
- Connected to the harness using a **Delta Maillon**, the ascender is held in position by the adjustable webbing strap on the harness.
- Complies with EN567
- Ref. : 1004254

EDGE ROLLER

- Positioned close to the anchorage point, the edge roller is designed to protect the rope against abrasive edges.
- Ref. : 1007043

DELTA MAILLON
Ref. : 1010237 ■

Suspension System

New!

COMFORT & FREEDOM OF MOVEMENT

REACHING YOUR EXPECTATIONS...

MILLER Ropax HARNESS

DESIGNED FOR EFFICIENCY

THE ROPAX HARNESS BY MILLER IS A NEW SUSPENSION HARNESS DEDICATED TO ROPE ACCESS AND RESCUE. THE INNOVATIVE DESIGN OFFERS A REAL IMPROVEMENT IN SUSPENSION COMFORT AND FREEDOM OF MOVEMENT RESULTING IN INCREASED PRODUCTIVITY.

ROPAX HARNESS - NEW TRIANGULAR SUSPENSION POSITION

WITH 4 POINTS OF PRESSURE INSTEAD OF 2 FOR OPTIMUM SUSPENSION COMFORT

4 Point Suspension System

The forces are split between the leg straps and the waist belt rather than being concentrated on the legs, thus providing enhanced ergonomics and increased user comfort whilst reducing the risks of suspension trauma.

ROPAX HARNESS - THE RANGE

- 1**
ROPAX HARNESS
- Manual buckles
 - Black polyester webbing

Ref	Size
1014434	S/M
1014435	L/XL

- Automatic buckles
 - DualTech™ webbing

Ref	Size
1015110	S/M
1015111	L/XL

CE-Certified. Complies with EN 361, EN 358 and EN 813

INNOVATION TECHNOLOGY DEDICATED TO ROPE ACCESS AND RESCUE

THE ROPAX HARNESS COMBINES INNOVATION WITH TECHNOLOGY TO OFFER A HARNESS THAT MEETS THE EXACTING REQUIREMENTS OF PROFESSIONALS IN THE FIELDS OF ROPE ACCESS, FIRE AND RESCUE, AND DEFENCE...

2 WEBBING OPTIONS

- DualTech™ or Black polyester webbing**
 - DualTech™ webbing:** Engineered with shape retention memory for a more comfortable, easy fit with two-sided, contrasting webbing and texture (nylon and polyester).
 - Black polyester webbing:** Lightweight and resistant.

WEB FINIALS

- Clip-on design safely organises webbing after proper adjustment**
 - Constructed of durable high-impact resistant polymer.
 - Provides gripping surface for easy web adjustment.

PERFECT FIT

- Adjustment webbing straps between the leg straps and the belt allow for an exact fit**

GEAR LOOPS

- 3 large, easily accessible gear loops accommodate all tools and accessories**

“LEFT” & “RIGHT” TAGS

- The harness is easy to put on thanks to clear “Right” and “Left” tags**

V SHAPE

- The V shape of the shoulder straps has been redesigned to prevent the straps from digging into the neck and causing irritation**
 - With the DualTech™ webbing option, the nylon material on the sides prevents irritation.

ADJUSTABLE WEBBING SLING

- Designed to vertically position the ascender tight to the harness**
 - Maximises productivity thanks to the correct positioning of the ascender which facilitates ascension.
 - This strap can be removed when not in use.

EXTRA-WIDE PADDED BELT

- Based on the world famous Butterfly tree-pruning harness**
 - Provides excellent lumbar support and comfort during prolonged work in suspension.

SIDE D-RINGS

- Foldable when not in use**

PADDED LEG STRAPS

- For increased comfort**
 - The specific configuration of the leg straps and belt maintains the legs in a slightly elevated position for improved suspension comfort.

ACCESSORIES

Ref. : 1015205

ERGO SOFT DORSAL PAD

- Designed to protect the back and facilitate harness donning**
 - The outside webbing protects against impacts and abrasion.
 - Mesh membrane allows superior air flow.
 - The transversal pad is fitted to the dorsal pad.

Ref. : 1015206

TRANSVERSAL PAD

- Allows the user to adopt a semi-reclined work position without straining the abdominals**
 - Fully adjustable, the transversal pad clips onto the ErgoSoft dorsal pad and connects to the climbing line by means of a karabiner.
 - The sliding belt offers a greater freedom of movement and reach.
